

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the final discussion of this research. There are two points presented in this chapter. The first point is presenting the researcher's conclusion drawn from the result. The second point presents the researcher's suggestions related to this research for the students, English teachers, and future researchers.

A. Conclusion

The results of this conclusion are categorized into 3 things:

1. Teachers are sure to use video to teach speaking because the teacher explains that using video has a lot of benefits, for students and teachers and can make it easier for teachers to teach speaking using video, and make it easier for students to understand what the teacher teaches by using videos.
2. Teacher belief applied in online learning, from this it can be concluded that the teachers really applies their beliefs about using video in teaching speaking in online learning, as evidenced by there is no difference between what the teachers believes and what is applied when teaching, the teachers use video to teach speaking to be applied in the online learning according to their beliefs.
3. The factors that shape the teachers' beliefs about using video to teach speaking are from books or journals they have read, and also the teachers' experiences while teaching.

B. Suggestion

1. For Teacher

The teachers should be able to use or take videos not only from YouTube but also from recording videos of herself and then the teacher can explain the material to be taught, this can also increase students' enthusiasm in learning.

2. For Other Researcher

For other researchers can use different objects, but still with the same subject, namely teachers' beliefs. For example from the different object is a media to be studied, because there are so many media that can be used for learning, especially speaking, so the teacher will be more confident in teaching and learning can be more interesting and fun.
