

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consist of two section, the first section deal with the conclusion findings of the research and the other one deal with suggestion.

A. Conclusion

After conducting research and analyze the research about the first students perceptions towards the use of digital storytelling in reading narrative text. Based on the result of the research, the researcher concluded that the most students had positive perception or agreed toward digital storytelling as media in reading narrative text. It can be seen in the perception the use of digital storytelling variable as many as 3% (very positive), 93% (positive), 3% (negative), and no one has a very negative perception.

On the variable students' perceptions of the influence digital storytelling towards their reading comprehension the majority of the students have a positive perception or agreed toward digital storytelling as media in reading narrative text. As many as 97% (positive), 3% (negative) and no one have a very positive and very negative perception. the mean value obtained from the results of students perception.

B. Suggestion

Based on the conclusion of this study, the researcher attempts to make some suggestions based on the research findings. Below is a list of suggestions.

1. For the Students'

Students should expect to be more independent and less lazy in understanding what is provided or explained by the teacher if they use digital storytelling as a learning medium.

2. For the teacher

Considering the various benefits of using digital storytelling media in the learning process, all teachers can advantage from it.

3. For the researcher

Future researchers who intend to perform similar research can use this study as a concept for their research. Researchers can also explore a variety of subjects connected to the usage of apps as a language learning tool.
