

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the results of the study from the Cycle 1 and Cycle 2, it can be concluded that learning writes the descriptive paragraph using four-square writing method permeables can increase the ability of writing at the class VIII B MTSn 1 Mojokerto. Based on the research findings in previous research above, the researcher concluded that teaching writing. Through this learning on the first cycle still looks inactive follow the lessons. However, on the next cycle of both students' learning activities looks more active because the teacher explains learning to implement descriptive text applying four square writing method so slowly. So that students become understanding with a task given. Through this learning students can be easily pour ideas based on the topics given so the students is very understanding. Increased also occurred in students grade score.

B. Suggestion

Based on the research result, the researcher gives some suggestion as follow:

- a. In the teaching of writing, teachers are more active in providing enthusiasm and motivation to students so that students do not feel bored in learning.
- b. Four Square Writing Method is very easy to apply for all grades, both elementary school to senior high school. This method is fairly effective for improving the quality of writing skill.

- c. For the researchers are advised to do further research on this method. Researchers the argued there are still some shortcomings in this study, it is hoped that for other researchers, this shortage can be used as material a referral to perform next research.
